About this Assessment

- In this assessment, you need to demonstrate your ability to collaborate and communicate effectively and safely with other people in a digital environment.
- There is one assessment task.
- This is a resource based assessment. You may refer to your learning materials, as well as any other relevant online and printed resources. However, all work must be your own, and communicated in **your own words**.

Important Note for Assessors

Before giving the assessment to learners, the assessor must refer to the Important Note for Assessors and Guidance Information given at the end of this assessment document. **This note includes important information for items which need to be prepared before the assessment is given to students.**

Learner Declaration

I confirm that I have read and understood the conditions of this assessment, and have had the opportunity to get any clarification that I need from my assessor. Any health and safety requirements that I must observe have been outlined. I confirm that all work completed for this assessment is my own and has been produced without assistance from anyone else. Finally, I confirm that the process by which I may seek a review of the marking for this assessment has been outlined to me.

Signed: _____ (learner) Date: _____

Assessment Task: Collaborate and communicate with others in a digital environment

Outcome 1, PC 1.1 to 1.4

What you need to do

- In this assessment task, you need to demonstrate your ability to collaborate and communicate effectively and safely with others in a digital environment.
- There are two options for this assessment. You must complete **one** option.

Option A

Option A is to use evidence from real collaboration you have done with others. For example, it could be evidence of collaboration with:

- other learners - on a joint course project(s)
- people you work with, in an organisation – on a task, project, or similar collaboration.

If you would like to complete this option, **before** you start work on the assessment, you **must** check with your assessor that the project will allow you to meet all the requirements of this unit standard.

OR

Option B

If it is impossible or impractical for you to use a real, actual project to meet the above requirements, you may ask your assessor to provide a scenario on which you can base your collaboration with others.

Part 1: Identify collaboration tools

You need to select and use **all of the following** types of collaboration tools to work effectively with other people in a digital environment.

- ☐ **Coordination tool:** Used to set up and manage group activities such as meetings, planning, etc. Examples include digital calendars, workflow systems, time trackers, task management tools, and planning tools.
- ☐ **Connectivity application:** Used to enable, support, or enhance a network connection with another device or website. These are often installed on a mobile device. Examples include QR code readers, website specific connection apps (eg screen sharing, messaging/video calling), remote log-in apps.

Continued on next page...

- ☐ **Conferencing tool:** Allows multiple people to communicate directly and in real time without needing to be in the same room. Example include video conferencing, telephone conferencing with screen sharing, web conferencing and webinars.
- ☐ **Online learning tool:** Allows you to learn, teach, or train via the Internet. Example include learning management systems (LMSs), online learning programs.
- ☐ **Social networking application:** Allows people to socialise and network over the Internet. Example include online social network, social messaging, photo and video sharing, ephemeral messaging, micro-blogging, group communication and chat sites, etc.
- ☐ **Document collaboration tool:** Allows multiple people to review, edit and comment on a single document file independently.

In the table on the next page, indicate what type of evidence you are providing for each type of tool. Also indicate the purpose, subject matter, context, and intended audience each tool was used for.

An example is shown in the box below:

Conferencing tool

☑ video conferencing ☐ telephone conferencing with screen sharing

☐ web conferencing ☐ webinars

☐ other (please specify) _____

Purpose of the tool: *To give my ideas and opinions on the best way to tackle the project we are going to work on together.*

Context: *Semi-formal. I don't know the members of my team well yet, so I don't want to use language that is too informal.*

Intended audience: *The people I am collaborating with to complete the project ...*

Notes

- You will not be assessed on your answers in the table that follows. Your answers will provide background information against which your assessor will evaluate the rest of this assessment task.
- Your assessor may help you to complete the table - to make sure you are clear on the communication purpose, subject matter, context and intended audience that each collaboration tool will be used for.
- If there is not enough room for your answers in the space provided in the table, you can use a separate sheet(s) of paper for your answers, or submit these digitally (eg a document file).

Collaboration tools used

Coordination tool

- ☐ digital calendar
- ☐ workflow system
- ☐ time tracker
- ☐ task management tool
- ☐ planning tool
- ☐ other (please specify) _____

Purpose and subject matter of communication:

Part 2

Cyber safety is an important consideration when using collaboration tools. In the table below, identify at least two potential risks of your digital collaboration. For each, describe at least one method for mitigating the risk.

Risk	Method of mitigating the risk

Part 3: Use the selected collaboration tools

You need to use the collaboration tools you selected to collaborate effectively with other people in a digital environment.

Your assessor will be using the following checklist to assess whether the evidence you have provided meets all the requirements of this standard. Read the checklist carefully and ensure you provide evidence that will allow your assessor to evaluate whether you have done **all** the items listed.

You can use the column headed 'Learner' to check off each item to make sure you meet all the requirements.

VERY IMPORTANT!

Make sure that you provide sufficient evidence of your digital collaboration to ensure your assessor can make a judgement regarding each of the requirements listed in the checklist above. For example, if you decide to submit a recording of a video conference as part of your evidence, you need to make sure that you provide a sufficient part of the conference to allow your assessor to see that you have communicated your ideas, information and/or opinions effectively, used appropriate language for the context, purpose, and person(s) you are communicating with, and so on.

You may check with your assessor to ensure suitable evidence is provided.

NOTE: The items listed need to be demonstrated collectively **across** the collaboration tools you use.

Assessor Checklist

PC	Item	Learner ✓	Assessor ✓
1.3	The learner effectively used each of the collaboration tools according to the specified purpose of the collaboration. This included all of the following.		
	• Ensuring the correct use of each of the chosen collaboration tools by selecting and using the appropriate feature(s) or function(s) of each tool.		
	• Contributing ideas, information and opinions using the collaboration tools.		
Assessor's Comments			

Continued on next page...

1.2	The learner applied all of the following effective communication practices and etiquette for online use when collaborating with others.		
	A. Fit for purpose communication in terms of all of the following.		
	• Purpose of communication		
	• Context of communication (eg informal, formal, business, social, etc)		
	• Subject matter		
	• Intended audience		
	• Organisational requirements		
	B. Appropriate behaviours and attitudes when collaborating, including all of the following.		
	• Respect for others, the subject matter and the organisation.		
	• Timeliness		
	• Discretion		
	• Confidentiality		
	• Appropriate language use		
	• Commitment to the team or group you are collaborating with.		
	• Culturally appropriate commiunication		
	C. Appropriate etiquette for online use, including any of the following which are relevant to the specific situation.		
	• Netiquette		
	• Digital citizenship		
	• Cyber safety		

Assessor's Comments

Continued on next page...

1.4	The content of the learner's communication: ☐ is effective ☐ meets recognised conventions for the: o purpose o target audience o context o digital environment used. This includes all of the following.		
	• Language appropriate to context.		
	• Images appropriate to context.		
	• Communications sent in accordance with organisational procedures and requirements. **IMPORTANT**: ☐ Learner must submit a copy of the organisation procedures and requirements as evidence.		
GI 3	Evidence of the following communication and interpersonal skills are provided: ☐ written		
	☐ verbal		
	☐ non-verbal		
	☐ formal		
	☐ informal		

Assessor's Comments

Assessor's Attestation

I confirm the candidate identified on this checklist performed the tasks described in this checklist and attest that this is a true and accurate record of the candidate's performance.

Assessment Schedule for Unit 29796v2a

Collaborate and communicate with others effectively and safely in a digital environment
Level 3 Credits 7

Name	Date
Course	NSN No.

Performance Criteria	Evidence Statement (what the assessor looks for)	Judgement Statement (how well or how many)	✓
Outcome 1: Collaborate and communicate with others effectively and safely in a digital environment.			
1.1 Cyber safety issues are identified, and potential risks and how to mitigate these are described, when working collaboratively in a digital environment.	Assessment Task 1: Part 2 [See guidance in Assessment Sample Answers.]	The learner identified three potential cyber safety risks and described at least one method of mitigation per risk.	
1.2 Effective communication practices and etiquette for online use are applied when collaborating with others. *Range: effective communication practices include but are not limited to – respect, timeliness, discretion, confidentiality, language used, commitment, cultural appropriateness;* *etiquette for online use includes – netiquette, digital citizenship, cyber safety.*	Assessment Task 1: Part 3 Evidence of communication online Assessor Checklist 1.2 [See guidance in Assessment Sample Answers.]	The learner demonstrated their ability to apply effective communication practices and appropriate online etiquette when collaborating with others in a digital environment. This included demonstrating the following behaviours and attitudes. • Respect • Timeliness • Discretion • Confidentiality • Appropriate language use • Commitment to the organisation, team and/or task being collaborated on. • Cultural appropriateness As relevant, the learner demonstrated appropriate netiquette, digital citizenship, and cyber safety.	

Continued on next page...

Performance Criteria	Evidence Statement (what the assessor looks for)	Judgement Statement (how well or how many)	✓
1.3 Collaboration tools are reviewed, selected and used effectively within a digital environment according to the requirements of a given purpose. *Range: includes but is not limited to – coordination tool, connectivity application, conferencing tool, online learning tool, social networking application, document collaboration tool;* *effective use of collaboration tools includes but is not limited to – use according to good practice; contribution of ideas, information, opinions.*	Assessment Task 1: Part 1 and Part 3 Evidence of collaboration tools selected and used Assessor Checklist 1.3 [See guidance in Assessment Sample Answers.]	The learner used each of the following collaboration tools to contribute ideas, information and opinions. • Document collaboration tool • Coordination tool • Connectivity application • Conferencing tool • Online learning tool • Social networking application For each of these collaboration tools, the learner selected and used the appropriate feature or function to enable the correct use of the tool (ie good practice).	
1.4 The communication is carried out with content that is effective and meets recognised conventions for the purpose, intended audience, context and digital environment used. *Range includes but is not limited to – language and images appropriate to context; sent in accordance with organisational requirements.* *GI 3:* Evidence of written, verbal and non-verbal, formal and informal communication and interpersonal skills are expected to be demonstrated collectively and/or holistically across this standard when collaborating and communicating effectively with others in a digital environment.	Assessment Task 1: P Part 3 Evidence of collaboration tools selected and used Assessor Checklist 1.4 [See guidance in Assessment Sample Answers.]	The content is communicated effectively and meets recognised conventions for the • Purpose of the communication • Target audience • Context (including language use and images that are appropriate to the context) • Digital environment used. The communication is sent in keeping with organisational procedures and requirements. Evidence of written, verbal, non-verbal, formal and informal communication is provided.	
Assessor's Comments:			

Assessor's Attestation:

As assessor for this unit standard, I have ensured sufficiency of performance and knowledge by this learner. I can confirm that the assessment conditions and the actions of the learner and assessor have complied with all relevant Health and Safety requirements, in addition to any other relevant compliance requirements.

Important Note:

Make sure that the Assessment Sample Answers document and any other sample answers or evidence are forwarded with this assessment booklet when external moderation is called for.

Unit Standard 29796 Version 2

Collaborate and communicate with others effectively and safely in a digital environment

Outcomes and Performance criteria

Outcome 1

Collaborate and communicate effectively and safely with others in a digital environment.

Performance criteria

1.1 Cyber safety issues are identified, and potential risks and how to mitigate these are described, when working collaboratively in a digital environment.

1.2 Effective communication practices and etiquette for online use are applied when collaborating with others.

Range effective communication practices include but are not limited to – respect, timeliness, discretion, confidentiality, language used, commitment, cultural appropriateness;
etiquette for online use includes – netiquette, digital citizenship, cyber safety.

1.3 Collaboration tools are reviewed, selected and used effectively within a digital environment according to the requirements of a given purpose.

Range includes but is not limited to – coordination tool, connectivity application, conferencing tool, online learning tool, social networking application, document collaboration tool;
effective use of collaboration tools includes but is not limited to – use according to good practice; contribution of ideas, information, opinions.

1.4 The communication is carried out with content that is effective and meets recognised conventions for the purpose, intended audience, context and digital environment used.

includes but is not limited to – language and images appropriate to context; sent in accordance with organisational requirements.

Guidance information

1. Assessment, where applicable, will be conducted in and for the context of a real or realistic situation and/or setting, and be relevant to current and/or emerging practice. The assessor may gather evidence over time from a range of scenarios rather than using one assessment where the learner has to demonstrate all of the required skills. The assessment context for this unit standard must be suitable to meet the criteria for level 3 in the NZQF Level Descriptors, which are available by searching for "level descriptors" at www.nzqa.govt.nz.
2. The provided purpose for a learner's collaboration and/or communication will include sufficient information and requirements against which the success or otherwise of the collaboration, communication and connectivity can be assessed, and must be diverse and of sufficient complexity to provide scope for the assessment evidence.
3. Evidence of written, verbal and non-verbal, formal and informal communication and interpersonal skills are expected to be demonstrated collectively and/or holistically across this standard when collaborating and communicating effectively with others in a digital environment.
4. Definitions

   Collaborate means to work with other people in a team and involves self-direction, creativity, and innovation.

   Collaboration tools refers to asynchronous and synchronous tools such as the wide range of coordination tools, connectivity applications, conferencing tools, online learning tools, social networking applications, and document collaboration tools.

   Conferencing tools connect multiple users in diverse locations in real-time, and refers to any of video conferencing, telephone conferencing, screen sharing apps, web conferencing, webinars.

   Connectivity application refers to a software application used to enable, support, or enhance a network connection with another device or website; often installed on a mobile device, and refer to any of quick response (QR) code readers, website specific connection apps (such as screen sharing, messaging/video calling), remote log-in apps.

   Coordination tools refer to calendars; workflow systems; time trackers; task management tools; planning tools.

   Cultural appropriateness refers to sensitivity to other cultures, beliefs, philosophies, and awareness of how diverse, ethnic, racial, and/or linguistic groups differ from one's own.

   Cyber safety refers to the safe and responsible use of information on the internet and other connected environments, aimed at maximising the user's personal safety and protecting self from malicious users (such as spam, phishing, cyberbullying, cyberstalking).

Continued on next page...

Digital citizenship refers to the norms of appropriate, responsible behaviour with regard to confident and positive engagement with digital technology.

Good practice refers to selecting and using the appropriate feature or function to enable correct use of the chosen collaborative tools.

Netiquette refers to acceptable social conventions for communicating on the internet.

Online learning tool refers to learning management systems, online learning programs.

Online use refers to social networking applications, internet forums, online computer games, web-conferencing, and messaging.

Organisational requirements mean the documented policies and procedures or commonly accepted practices of a workplace, school or training provider. The learner must be given access to the policy and procedures prior to being assessed against this unit standard.

Social networking applications refer to online social network, social messaging, video sharing, photo sharing, ephemeral messaging, micro-blogging, group communication and chatting sites.

5. Legislation relevant to this unit standard may include but is not limited to the:

   Copyright Act 1994

   Copyright (New Technologies) Amendment Act 2008

   Electronic Transactions Act 2002

   Films, Videos, and Publications Classification Act 1993

   Harmful Digital Communications Act 2015

   Health and Safety at Work Act 2015

   Official Information Act 1982

   Privacy Act 2020

   Protected Disclosures Act 2000

   Unsolicited Electronic Messages Act 2007

   and any subsequent amendments.

   Current legislation and regulations can be accessed at http://legislation.govt.nz.

6. Reference

   ACC5637 Guidelines for Using Computers - Preventing and managing discomfort, pain and injury. Accident Compensation Corporation - Department of Labour, 2010; available from WorkSafe New Zealand, at https://www.worksafe.govt.nz/topic-and-industry/work-related-health/ergonomics/safely-using-computers-at-work/.

Important Note for Assessors

1. For learners completing this assessment in a real collaboration situation in their workplace or learning institution (ie **Option 1**) it is crucial that you ensure learners are clearly aware of the purposes of the collaboration and communication they need to complete, as well as the subject matter, the context, and the intended audience. You also need to ensure that the collaboration will allow learners to meet all the requirements of the standard. In other words, it needs to be extensive enough to allow for all of the required collaboration tools to be used, and to allow learners to demonstrate their effective use of these collaboration tools to contribute ideas, information and opinions. It MUST also include the requirement to communicate both language and **images** with others (to meet the requirements of PC 1.4). Refer to the **Assessment Sample Answers** document for further guidance.
2. For learners completing this assessment in learning institution, it is expected that they will gather evidence over an extended period of time from communications they have will their peers and teacher(s) regarding a team project or similar collaborative task(s) or project(s) learners are completing. This task/project could be one linked to the Computing curriculum, or a different subject area. For example, if four learners completing this unit standard are also working together on a project for their Physics course, they could use evidence from the collaboration (using digital tools) on the Physics project.
3. If it is impossible or impractical for the learner to use a real, actual project to meet the assessment requirements, you may provide a scenario which learners could use for their project. An example of such a scenario is provided in the **Assessment Sample Answers** document.
4. Sample answers and/or assessor's comments are supplied in the separate **Assessment Sample Answers** document available to assessors.
5. A copy of the **Assessment Sample Answers** document and any other assessment evidence must be submitted with this **Assessment Booklet** when moderation is called for.
